

AMENDMENTS TO THE CLAIMS

Please cancel Claims 1 to 41.

Please add new claims 42 to 54.

Claims 1 to 41 (Cancelled)

42. (New) An isolated nucleic acid molecule consisting of a polynucleotide sequence selected from the group consisting of:

(a) an isolated polynucleotide encoding a polypeptide corresponding to amino acids 1 to 330 of SEQ ID NO:2 including the start codon;

(b) an isolated polynucleotide encoding a polypeptide corresponding to amino acids 2 to 330 of SEQ ID NO:2 minus the start codon;

(c) an isolated polynucleotide encoding the HGPRBMY11 polypeptide as encoded by the cDNA clone contained in ATCC Deposit No: PTA-2766;

Al (d) an isolated polynucleotide which represents the complimentary sequence (antisense) of (a), (b), and (c).

43. (New) The isolated nucleic acid molecule of claim 42, wherein said polynucleotide is (a).

44. (New) The isolated nucleic acid molecule of claim 43, wherein said polynucleotide consists of nucleotides 515 to 1504 of SEQ ID NO:1.

45. (New) The isolated nucleic acid molecule of claim 42, wherein said polynucleotide is (b).

46. (New) The isolated nucleic acid molecule of claim 45, wherein said polynucleotide consists of nucleotides 518 to 1504 of SEQ ID NO:1.

47. (New) The isolated nucleic acid molecule of claim 42, wherein said polynucleotide is (c).

48. (New) The isolated nucleic acid molecule of claim 42, wherein said polynucleotide is (d).

49. (New) A recombinant vector comprising the isolated nucleic acid molecule of claim 42.

50. (New) A recombinant host cell comprising the vector sequences of claim 49.

51. (New) A method of making an isolated polypeptide comprising:

(a) culturing the recombinant host cell of claim 50 under conditions such that said polypeptide is expressed; and

(b) recovering said polypeptide.

52. (New) The isolated polynucleotide of claim 42 wherein said nucleic acid sequence further comprises a heterologous nucleic acid sequence.

53. (New) The isolated polynucleotide of claim 52 wherein said heterologous nucleic acid sequence encodes a heterologous polypeptide.

54. (New) The isolated polynucleotide of claim 53 wherein said heterologous polypeptide is the Fc domain of immunoglobulin.
